

“What She Wants...”

BEAUTY

You deserve the best that life has to offer. So start by nourishing your skin with one of the rarest and most precious gifts of nature – caviar. And if you think it's just a culinary delicacy, think again! Packed with nutritious matter called Vitellus (from the Latin word “vita” meaning “life”), caviar is rich in metabolic precursors.

Did you know that fresh caviar stimulates the cell production of collagen and fibronectin, which play an essential role in the skin repair process? Caviar also provides your skin with a revitalising cocktail of amino acids. Wondering if this treatment will suit you? You'll be amazed to know that your skin cells will assimilate all the metabolic precursor constituents according to its unique needs.

Pamper your skin today with the luxurious Divine Caviar Facial at Estetica. This intense regeneration treatment works wonders on mature and devitalised skin. You can also try Estetica's Fresh Caviar range, which is the first refrigerated skincare line that is formulated to stimulate skin's regeneration, minimise signs of ageing and strengthen skin's natural mechanisms. This innovative skincare range includes the non-greasy and quick-absorbing Fresh Caviar Moisturising Fluid, Nourishing Fluid and Firming Fluid.
